

Re-inventing the world of beverage dispensers

Big Juice

*A machine that delivers **chilled beverages**, while providing maximum **freedom and flexibility** of use.*

***Big Juice** can be placed in the breakfast area, on the terrace, near the swimming pool, in the garden or wherever you wish your customers to enjoy a **refreshing drink**.*

Big Juice features a brushed gray body, while the front graphics is illuminated by neon lamps. To enhance safety, the door is equipped with a key lock.

The **electronic system** controls the product to water ratio.

Refrigerating gas		R134a
Standard colour		Brushed grey
Machines per pallet		8
Pallet dimensions	cm	80x10x180
Pallet gross weight	kg	360

Functioning by mixing a concentrated base (fruit syrup) with water to obtain the drink. Always read the User's Manual.

Features

Big Juice delivers chilled beverages produced by mixing a concentrated base with water and is ideal for medium-size accommodation facilities, cafes etc.

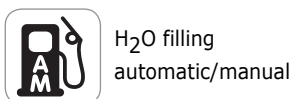

The machine delivers two flavours + water and works with bag in box or container (up to 5 litres).

The post-mix delivery system with automatic rinsing is based on pre-set doses:

- glass-full (standard 200 cc);
- jug-full (standard 1 litre);
- the parameters can be edited through the programming function.

- **AUTOMATIC:** the machine is connected to the water supply and the water level doesn't change; after every delivery it is automatically replenished.
- **MANUAL:** the machine is filled manually and the operator needs to restore the water level when the system warns it is too low. Water tank has a 10-litre capacity.
