Functions with water/milk added to products for ice cream, slush, cream, sherbet or with ready to use mixed product base. Tanks work independently. Lockable lid. Always read the user's manual.

Features

GT Push is user-friendly and easy to clean. It is ideal for producing and dispensing a variety of offerings, including yoghurt, thick shakes, creamy coffee and frozen juice.

An elegant-looking unit with the advantage of a small footprint makes it ideal for businesses with restricted counter space.

The I-TANK™ Technology prevents ice accumulation on the outer side of the bowl.

The PUSH button feature increases the motor speed allowing quicker dispensing of product.

GT Push is a simple and reliable unit. It is designed to operate with water or milk-based product. It is capable of producing a significant over-run ensuring a high return on investment.
