## SP ILLUMINATED

A STYLISH DESIGN THAT  
ENHANCES THE PRODUCT

SP 1 Illuminated

SP 2 Illuminated

SP Illuminated model gives **maximum importance to your product**, thanks to the double system of LED lights that illuminate the upper and lower part of the tank.

## Features

### Double system of LED lights

The bowl of SP is illuminated by **LED lights**, giving the equipment an even more attractive look. LED lights illuminate the tank from **above and below**, enhancing the product, increasing its visibility and promoting impulse purchases.

### I-Tank® insulated bowl

Thanks to the unique bowl patented by SPM, **energy consumption is reduced and the product reaches the set consistency much more quickly**. The insulated bowl also improves the look of the equipment by reducing condensation on the sides of the bowl.

### Hybrid control of consistency

Exclusively patented by SPM. The integrated software allows the equipment to **self-adjust** to ensure that the product always has the **same consistency**, from the first to the last drop dispensed.

### Green GAS

**R290 (propane) refrigerant gas will be used in all of our equipment**, in compliance with European and environmental regulations.

### A new design, increased ergonomics

The new style gives SP Illuminated a **modern, attractive look**, while the **new screw** for adjusting product hardness makes changing the settings easier and quicker.

### Control also in defrost mode

Product quality is maintained also in DEFROST mode. A **sensor** allows the temperature to be controlled, thus **avoiding sudden fluctuations** that would degrade the product and compromise the final result.

# SP ILLUMINATED

## A STYLISH DESIGN THAT ENHANCES THE PRODUCT

SP Illuminated is a compact countertop machine that dispenses **cold creams, sorbets** and other creamy specialties. It works with **water or milk-based powdered preparations or ready-made mixes in cartons** to be poured directly into the bowl.

SP Illuminated comes in **one or two bowl versions** that operate independently.

**Easy to use and clean**, all parts that come in contact with the product can be disassembled without using any tools.

SP Illuminated also offers a significant ROI due to its **high overrun**.

### EXCLUSIVE PATENTS

These include the **I-Tank® insulated bowl** and the innovative **hybrid control** of the product consistency.

### A CLEAN, MODERN LOOK

The **sleek design** render SP appealing and eye-catching.

### FOCUSING ON THE FINAL PRODUCT

The **focus is on the final product**, which is why SP range has adopted various standards to **ensure its quality and wholesomeness**: such as hybrid consistency control, and the sensor that controls the temperature also in defrost mode.

### PRACTICALITY AND SIMPLICITY

The **new design of the screw** for adjusting the consistency of the product **makes it much easier to use this equipment**, that is already user-friendly.

### RESPECT FOR THE ENVIRONMENT

To protect the planet, all of our equipment uses the **natural refrigerant, R290** (propane).
